RAMMED EARTH
EXPERTS

RAMMED EARTH

Rammed Earth walls are constructed by ramming a mixture of selected aggregates, including gravel, sand, silt, and a small amount of clay, into place between flat panels called formwork.

A photograph of a modern architectural interior. The ceiling is composed of numerous horizontal wooden beams, creating a rhythmic pattern. The walls are made of large, light-colored stone blocks. The floor is covered in a dark, textured material, possibly gravel or small stones, with white lines marking a path. The lighting is warm and natural, highlighting the textures of the materials.

Architecture is an art form that
create a sense

The image shows a modern architectural interior. On the left, a wall is made of vertical wooden planks and features a square window with a dark frame. To the right, a wall is covered in a pattern of diagonal stripes made of light-colored wood or plaster. The floor is covered in a layer of reddish-brown gravel. The ceiling consists of horizontal wooden beams. The lighting is warm and directional, creating strong shadows and highlights on the walls and floor.

should provoke emotions and
of wonder. “Zaha Hadid”

RAMMED EARTH

Fusion of tradition and innovation for sustainable, striking structures.

Conmarble's rammed earth construction stands as a testament to the harmonious blend of age-old building techniques and cutting-edge sustainability. Meticulously crafted, each structure embodies a commitment to environmentally conscious practices utilizing natural materials and innovative construction methods. The rammed earth walls not only exude a unique, earthy aesthetic but also offer exceptional thermal mass, promoting energy efficiency and a comfortable living environment. Conmarble's dedication to marrying tradition with modernity results in structures that not only showcase architectural ingenuity but also contribute significantly to a more sustainable and eco-friendly future.

Sustainable Elegance

Conmarble's rammed earth construction seamlessly combines traditional aesthetics with sustainable practices, offering structures that are not only visually striking but also environmentally conscious.

Exceptional Thermal Performance

The inherent thermal mass of rammed earth walls ensures superior insulation, moderating indoor temperatures and reducing the need for artificial heating or cooling, thus enhancing energy efficiency.

الحنون الأوائل
EARLY DREAMERS

Minimal Environmental Impact

Utilizing natural materials in the rammed earth construction process minimizes the ecological footprint, promoting eco-friendly building practices and contributing to a healthier planet.

Long-lasting Durability

Conmarble's commitment to quality ensures that rammed earth structures exhibit robust durability. These buildings withstand the test of time, requiring minimal maintenance and contributing to long-term sustainability.

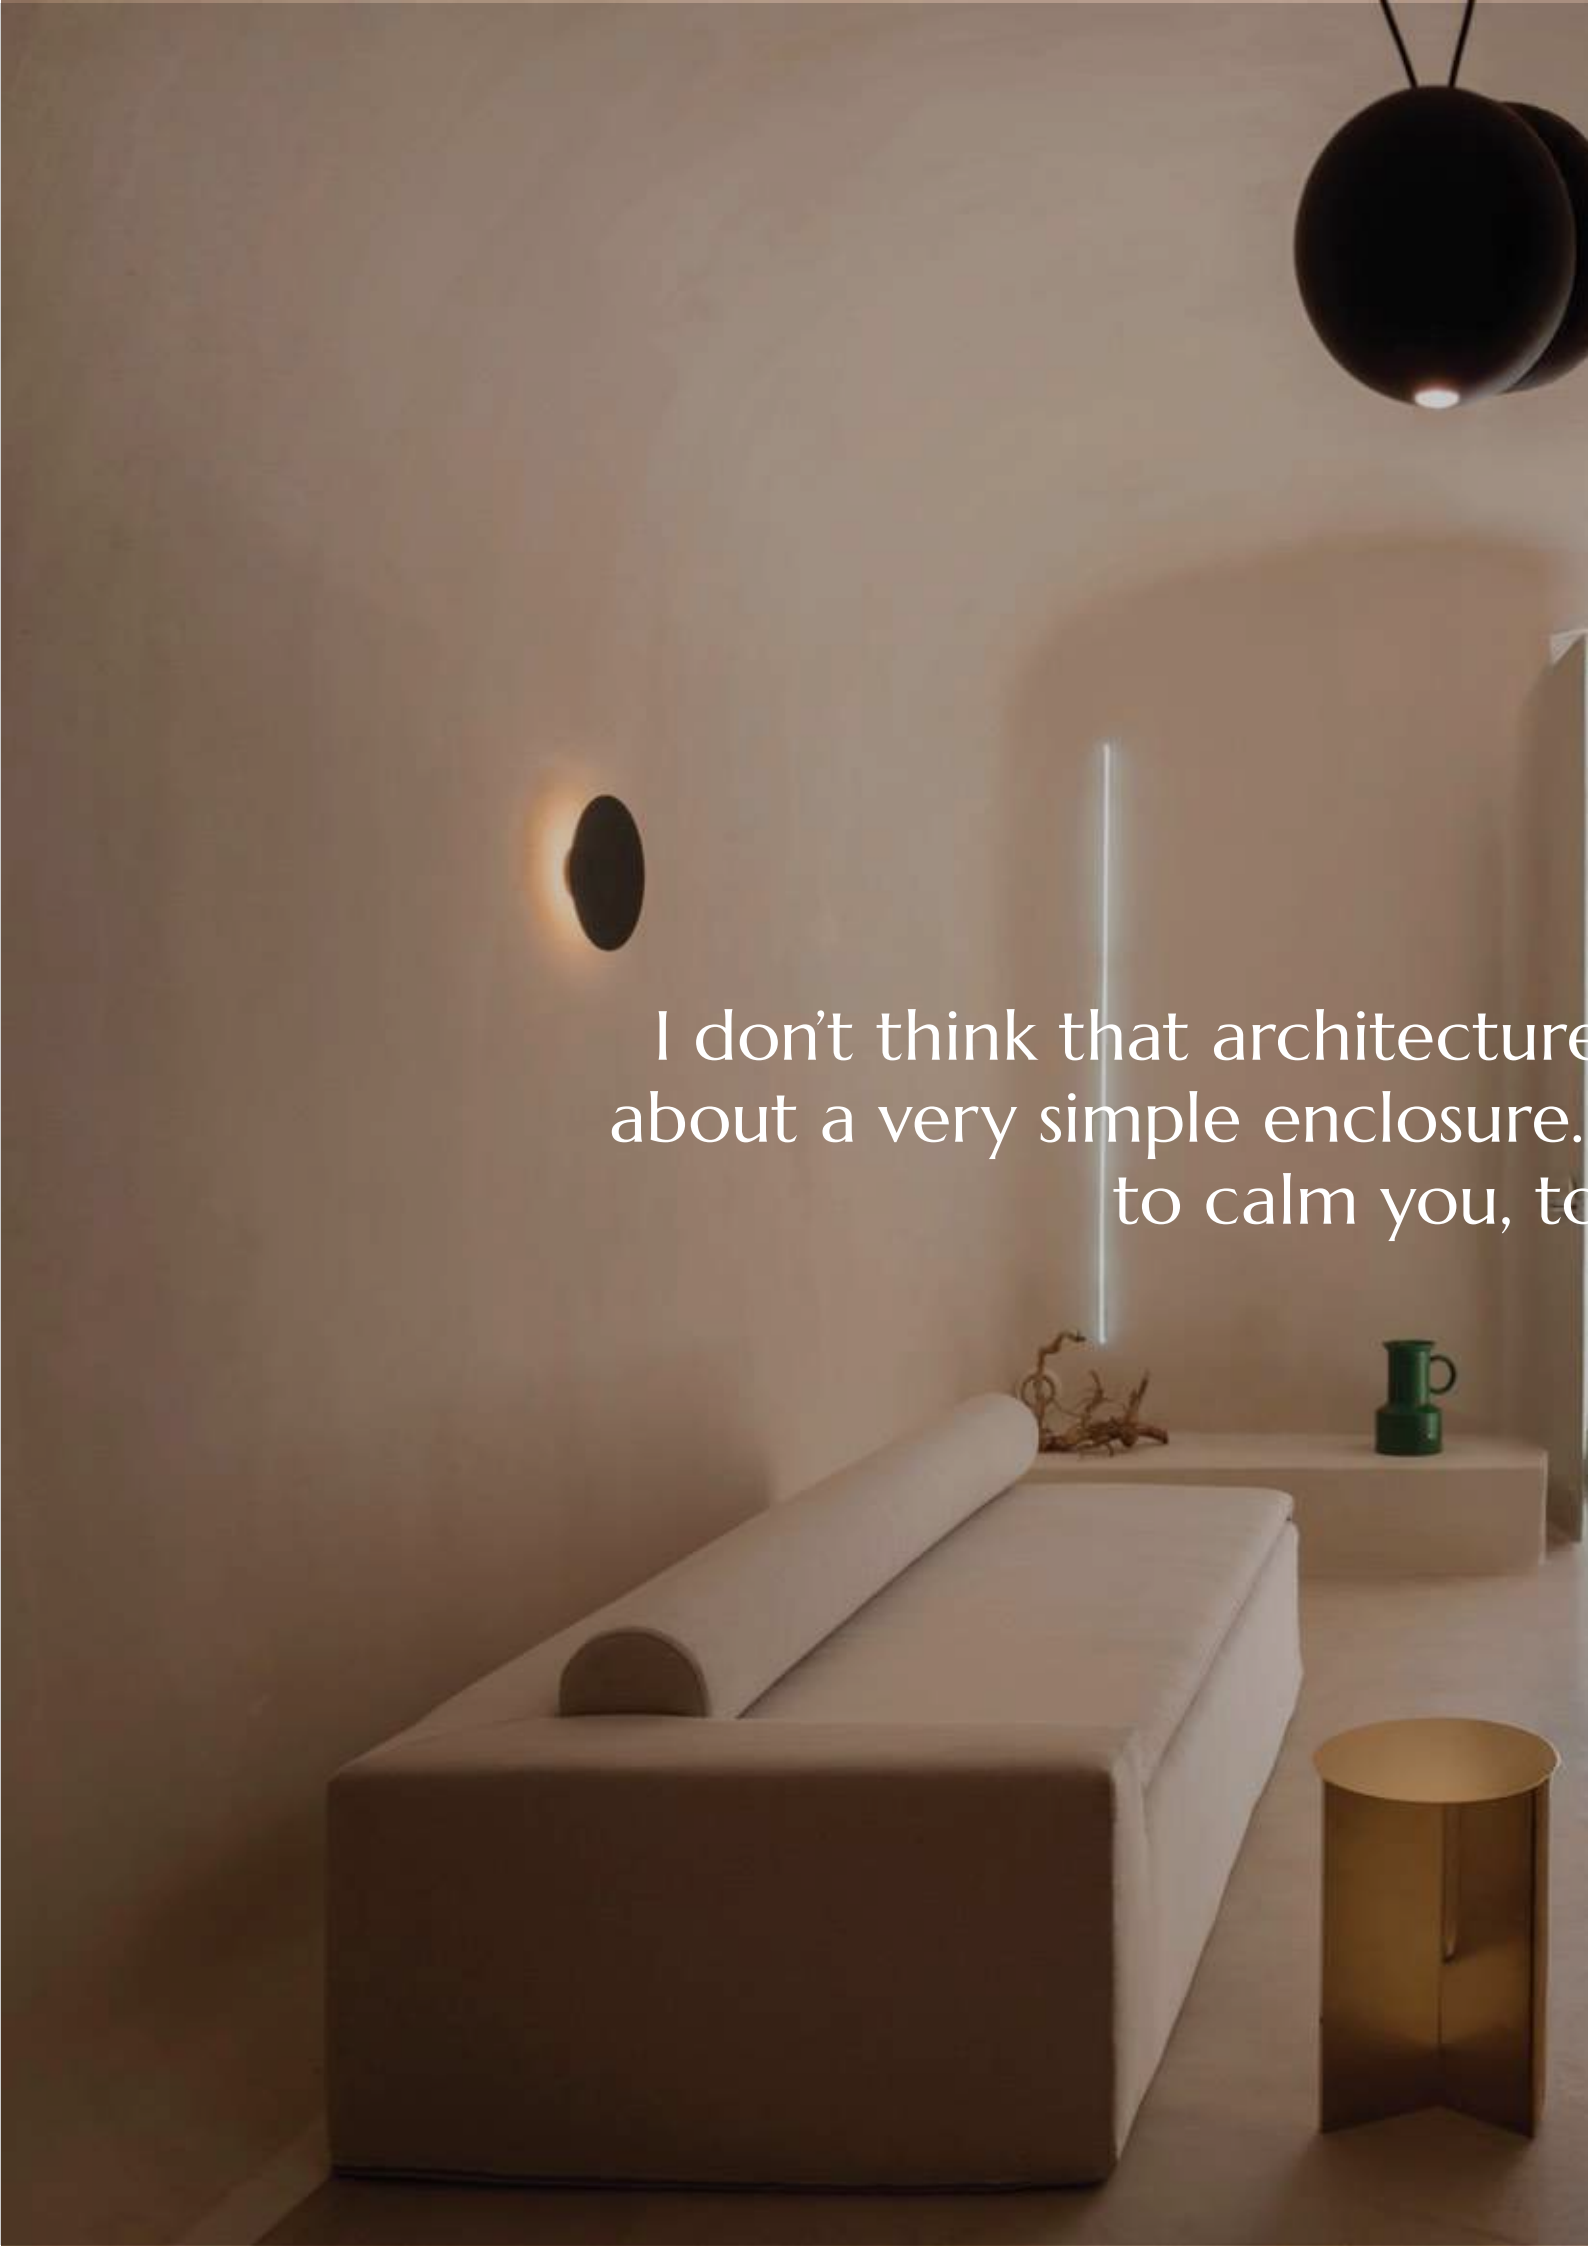

MICROCEMENT

The ultimate Interior Design Solution by Conmarble . Transform your home design and construction process with a comfortable living space that boasts seamless, low-thickness microcement floors. Elevate your interior decoration in Qatar and the Kingdom of Saudi Arabia with microcement's versatility and style

Microcement, featuring a slim 3mm profile, provides a smooth, continuous finish on any surface, such as marble or tile, without removing existing materials. No adjustments to door or window frames are needed. Effortlessly cover artex walls with microcement, bypassing the need while saving time. Enhance your walls with the convenience and elegance of microcement. Explore limitless design potential with microcement floors, where strength and sophistication collide. Delve into a variety of textures, hues, and finishes to craft a bespoke space that embodies your individual taste. Allow microcement walls to spark innovation and elevate our interiors to contemporary, refined sanctuary.

Beuty in 3mm
Microcement floors are characterized by their impressively thin composition, which offers significant benefits when it comes to updating a room's appearance without causing disruption to existing structures. Their slim profile ensures that other room elements, such as doors and windows, do not need to be resized or adjusted to accommodate the new flooring

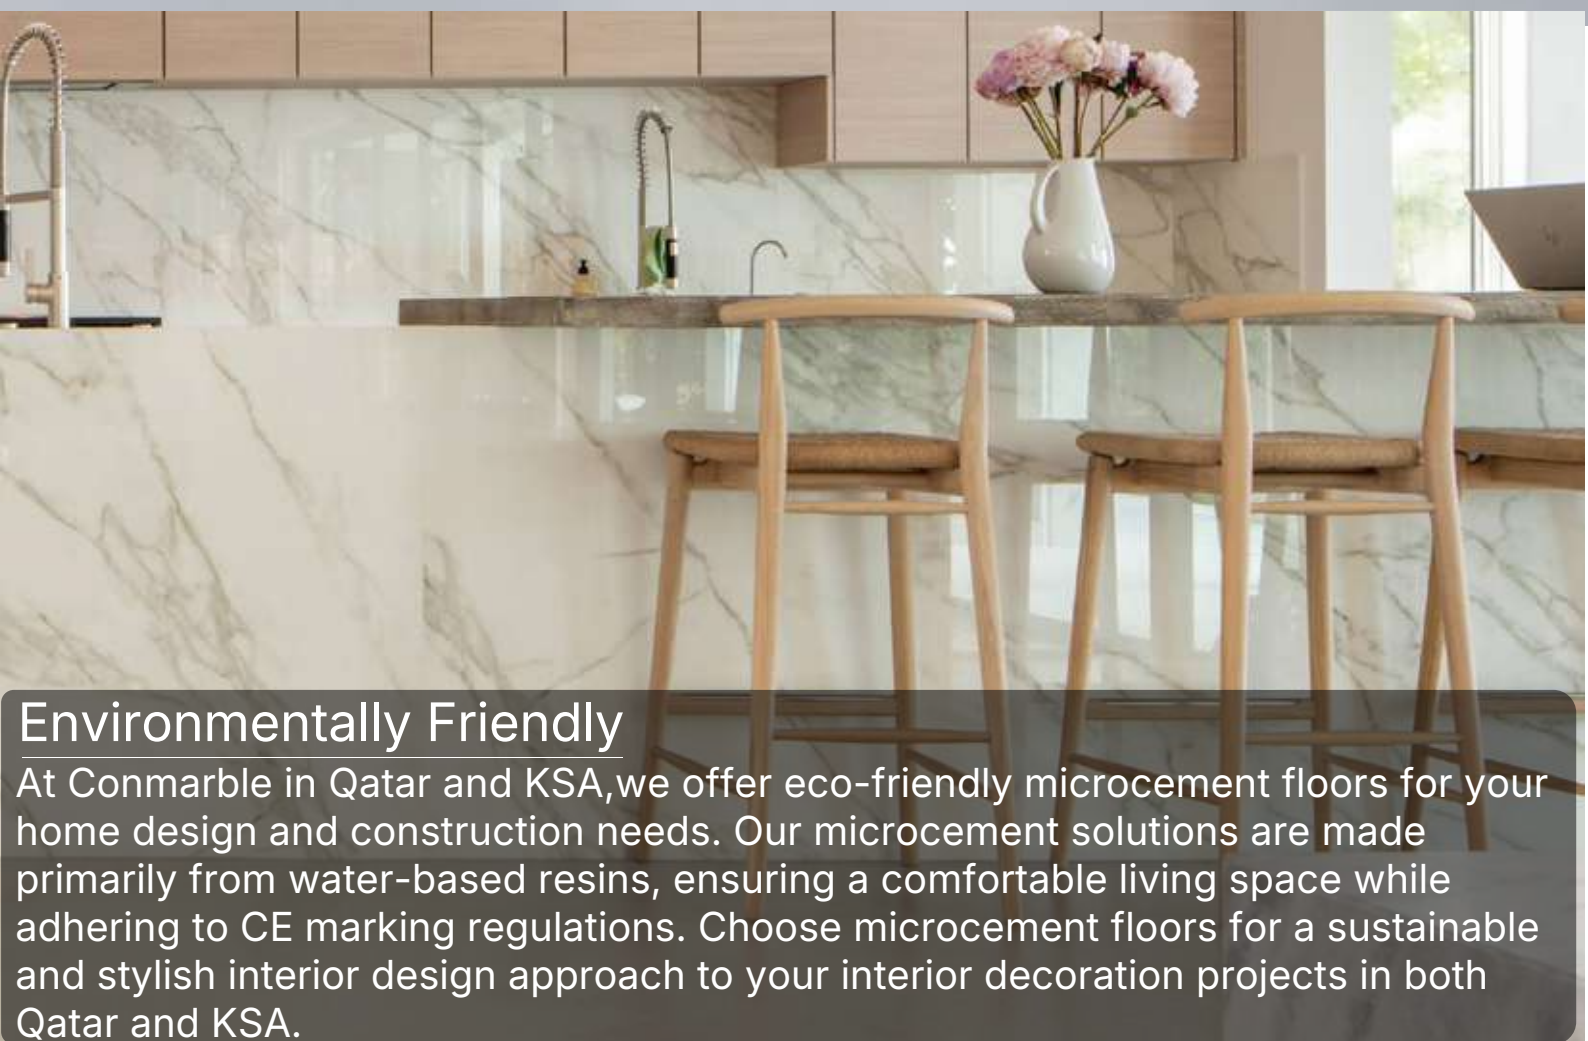

Direct Surface Application Made

Microcement floors provide a seamless and efficient solution by allowing direct application onto existing surfaces, which eliminates the need for generating construction debris. This approach proves to be more practical and time-saving compared to other types of floor coatings, making it a popular choice for modern renovations and designs.

EASY CLEANING

Microcement floors, provided by Conmarble Design `Studio in Qatar and Riyadh, offer a seamless, joint-free solution for your home design, promoting a cleaner and more comfortable living space . The lack of joint tsdeters bacteria and fungi growth, simplifying maintenance and interior decoration. Experience the efficiency of cleaning with a robot vacuum cleaner on continuous microcement floors, elevating your home construction and interior design experience.

Environmentally Friendly

At Conmarble in Qatar and KSA, we offer eco-friendly microcement floors for your home design and construction needs. Our microcement solutions are made primarily from water-based resins, ensuring a comfortable living space while adhering to CE marking regulations. Choose microcement floors for a sustainable and stylish interior design approach to your interior decoration projects in both Qatar and KSA.

3.3 MICROCEMENT FOR BATHROOMS

Transforming Bathrooms with Stylish Microcement Designs

Microcement floors in bathrooms are gaining popularity in Qatar and KSA , thanks to Conmarble innovative home design solutions. Our microcement offering cater to your home construction and interior decoration needs, providing a comfortable living space with a touch of personality. Interior designers adore Cemher microcement for creating tranquil and distinctive atmospheres in bathrooms, proving that even these spaces can exude elegance and charm.

Microcement in bathrooms is emerging as a fashionable choice among interior designers. Utilizing various types of Cemher microcement, you can craft a serene and inviting atmosphere in the bathroom. Contrary to popular belief, bathrooms can also exude character and uniqueness, becoming spaces of elegance and style.

Renovation without Desbris

Nervous about bathroom renovations? Choose Conmarble Microcement to avoid the mess. No need to remove tiles, saving you time, money, and hassle. Why still debate between microcement and tiles?

Say Goodbye to Dampness

Microne and Microrock are two distinct microcement types designed specifically for damp environments. Both of these microcement options possess inherent waterproof qualities, which means they don't require an additional sealant to prevent water penetration. This built-in impermeability is ideal for preventing moisture issues and makes them a top choice for use in shower areas, bathtubs, or washbasins.

ANTI-SLIP

The texture of bathroom microcement is a vital consideration in creating safe and slip-free microcement bathrooms. To achieve the best non-slip results, it's recommend to opt for finishes with a rougher grain, providing not only enhanced safety but also a unique aesthetic appeal.

Hygiene and Easy Cleaning

A common issue in bathrooms is the emergence of dampness and mold in shower joints, creating a breeding ground for fungi and bacteria. Conmarble's microcement, with its seamless, joint-free design, is the perfect solution for preventing bacterial growth.

3.4 MICROCEMENT FOR POOLS

Revolutionize your Outdoor Space with Microcement Pools

Explore the new trend in swimming pool design with Conmarble's microcement pools. Our modern swimming pools are tailored to suit the discerning tastes of clients in Qatar and KSA. As the go-to experts in swimming pool design, Conmarble creates stunning, durable, and low-maintenance pools that enhance your outdoor living experience. Discover how our innovative approach to swimming pool design can transform your backyard into a luxurious oasis. Choose Conmarble Natural Finishes for cutting-edge pool solutions that exceed expectations.

Our team of experts specializes in modern swimming pools, providing a fresh and innovative approach to swimming pool design in Qatar and KSA. We combine the latest technologies and design principles to create stunning, contemporary swimming pools that cater to the preferences and needs of our clients. Transform your outdoor space with Conmarble, where we pride ourselves on delivering exceptional quality and style in every swimming pool project.

Mykonos Style

Microcement swimming pools beautifully capture the essence of Mykonos style, blending modern aesthetics with the simplicity and elegance of the Greek islands. This innovative material creates a stunning seamless finish that enhances the pool's visual appeal and durability. Its versatility allows for the incorporation of the iconic Mykonos blue hues, white accents, and natural stone elements that are synonymous with this design style. With microcement, your swimming pool can effortlessly evoke the idyllic atmosphere of Mykonos while providing a low-maintenance, long-lasting, and visually striking addition to your outdoor living space.

Maldives at Home

Microcement pools offer a unique opportunity to bring the enchanting Atmosphere of the Maldives right into your backyard. The seamless and versatile nature of microcement allows for the creation of stunning, tropical-inspired designs that evoke the crystal-clear waters and pristine white sands of this island paradise. The material's durability and low-maintenance qualities make it the perfect choice for homeowners seeking a luxurious, resort-style escape just steps away from their living space.

- **Direct Surface Application**

Micropool microcement pools support both fresh water and saltwater, offering versatility. Note, not all microcements are suitable for pool applications.

- **Slip Resistance**

Microcement pool texture is vital for slip prevention. coarser grain finishes ensure non-slip surfaces, and Conmarble microcements provide secure footing.

- **Use in Spa's and Thermal Areas**

Relaxation-focused microcement pools resemble serene hot springs with natural stone look, gentle non-slip surface, and low maintenance requirements.

- **Easy Maintenance**

Microcement withstands salt, chlorine, and UV rays, preventing deterioration and eliminating the need for repainting or tile replacement.

VENETIAN/LIME PLASTER LUXURIOUS TEXTURED ECO-FRIENDLY

Cobnarble offers exquisite Venetian Plaster, a luxurious and textured wall finish that adds depth and sophistication to any space. Our expert artisans hand-apply this versatile material, ensuring a bespoke, high-quality result for every project. With a wide range of colors and finishes, our venetian plaster enhances the elegance and charm of both contemporary and traditional interiors, creating a truly unique and timeless aesthetic.

Architecture is really about w
people want to feel good in a
about shelter, but it's als

well-being. I think that
space ... On the one hand it's
about pleasure. "Zaha Hadid"

VENETIAN PLASTER

WALL FINISH WITH A RICH HISTORY

Venetian plaster, a dates back to ancient Roman times. This luxurious technique was initially used in the villas and palaces of the elite, gaining prominence during the Italian Renaissance in the 15th and 16th centuries. Crafted from a blend of lime plaster marble dust, and natural pigments, Venetian plaster became a symbol of prestige and sophistication. The skilled artisans of Venice were renowned for their mastery in creating stunning, smooth surfaces that resembled polished marble or natural stone. Today, this age-old technique continues to captivate designers and homeowners a like, offering a timeless and elegant aesthetic that seamlessly blends the past with modern interior design trends.

VENETIAN PLASTER
BENEFITS

CO₂ REDUCTION

Venetian plaster contributes to reducing CO₂ levels in the environment, thanks to its eco-friendly, lime-based composition. Lime has the unique ability to absorb and neutralize carbon dioxide during the curing process. Moreover, using this plaster promotes healthier living spaces for tenants by reducing indoor air pollutants and maintaining better air quality. Choosing Venetian plaster for your projects not only adds elegance and a timeless finish but also ensures a sustainable and eco-friendly solution that prioritizes the well-being of the occupants.

BREATHABLE

Venetian plaster is renowned for its permeable qualities, which permit walls to breathe, facilitating a natural exchange of air and moisture. This inherent breathability is beneficial in regulating humidity levels within living spaces, contributing to a healthier and more comfortable environment. By allowing excess moisture to escape, Venetian plaster effectively prevents the buildup of dampness and inhibits the growth of mold and mildew. The indoor air quality is improved, fostering healthier living conditions for occupants and reducing the risk of respiratory issues or allergies.

PREVENTS MOLD GROWTH

The organic composition of venetian plaster plays a crucial role in its resistance to mold and mildew growth. Derived from natural, lime-based materials, this plaster creates an environment that is unfavorable for the proliferation of mold, mildew, and other fungi. This inherent resistance ensures a clean, hygienic, and durable surface for your home, promoting a healthier living space for occupants. By choosing Venetian plaster for your interiors, you provide a long-lasting, easy-to-maintain surface that contributes to the overall well-being of your household.

DURABLE AND LONG LASTING

Venetian plaster is renowned for its exceptional durability and resistance to wear, a testament to its ancient origins dating back to Roman times. With a rich history spanning centuries, this timeless finish has withstood the test of time, proving its resilience and ability to maintain a stunning appearance for years to come. conmarble's expertise in crafting high-quality Venetian plaster ensures your walls will exhibit both elegance and longevity, making it a worthwhile investment for those seeking a combination of historical charm and enduring beauty.

ESTASI DI MARMO By GIORGIO GRAESAN

Crafted from natural, breathable materials, Segui il Tuo Istinto contributes to a healthier living environment.

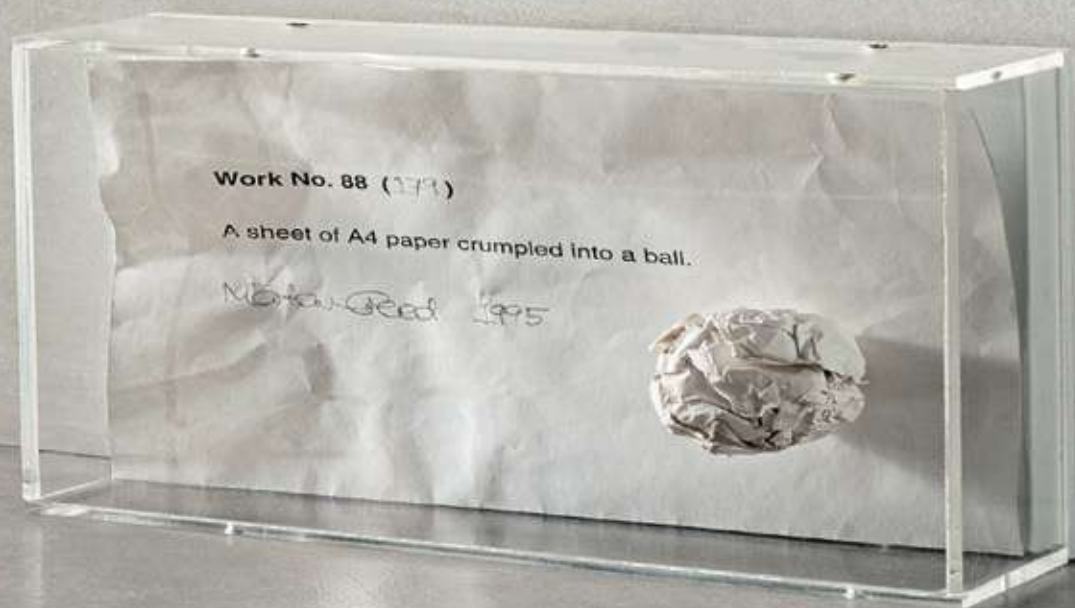

GIORGIO GRAESAN
Venetian Plaster

MARMORINO 2020 By GIORGIO GRAESAN

Marmorino 2020 by Giorgio Graesan is a revolutionary, high-quality Venetian plaster that embodies the essence of modern sophistication. skillfully crafted using authentic, natural ingredients, Marmorino 2020 provides a stunning, marble-like finish to elevate any interior space. This eco-friendly, breathable plaster is highly resistant to wear and tear, ensuring lasting beauty and durability.

DECORATIVE CONCRETE

AESTHETIC DURABLE LOW-MAINTENANCE

Conmarble's decorative concrete line offers clients an innovative and visually striking solution for their interior and exterior design needs. This versatile material is customizable, low-maintenance, and sustainable, making it an excellent choice for those seeking a unique aesthetic. Our expert craftsmen ensure the highest quality in every installation, providing a unique aesthetic. Our expert craftsmen ensure the highest quality in every installation, providing a durable and long-lasting finish that enhances any space with its modern appeal and timeless charm.

Decorative Concrte Characteristics

Conmarble's decorative concrete line presents a versatile, stylish, and durable flooring solution, perfect for both residential and commercial spaces. Its unique characteristics include a stunning visual appeal, low-maintenance requirements, and enhanced durability.

Enhanced Strength and Durability

The use of pure lithium densifier in conmarble decorative concrete increases surface hardness and abrasion resistance, ensuring a longer-lasting and more durable surface.

Improved Crack Resistance

The blend of micro and macro fibers incorporated into the concrete mix adds reinforcement, reducing the risk of cracks and shrinkage while enhancing its overall structural integrity.

Superior Moisture Protection

The penetrative sealer forms a protective barrier deep within the concrete's pores, safeguarding the surface from moisture infiltration damage due to freeze-thaw cycles.

Resistance to Stains and Chemicals

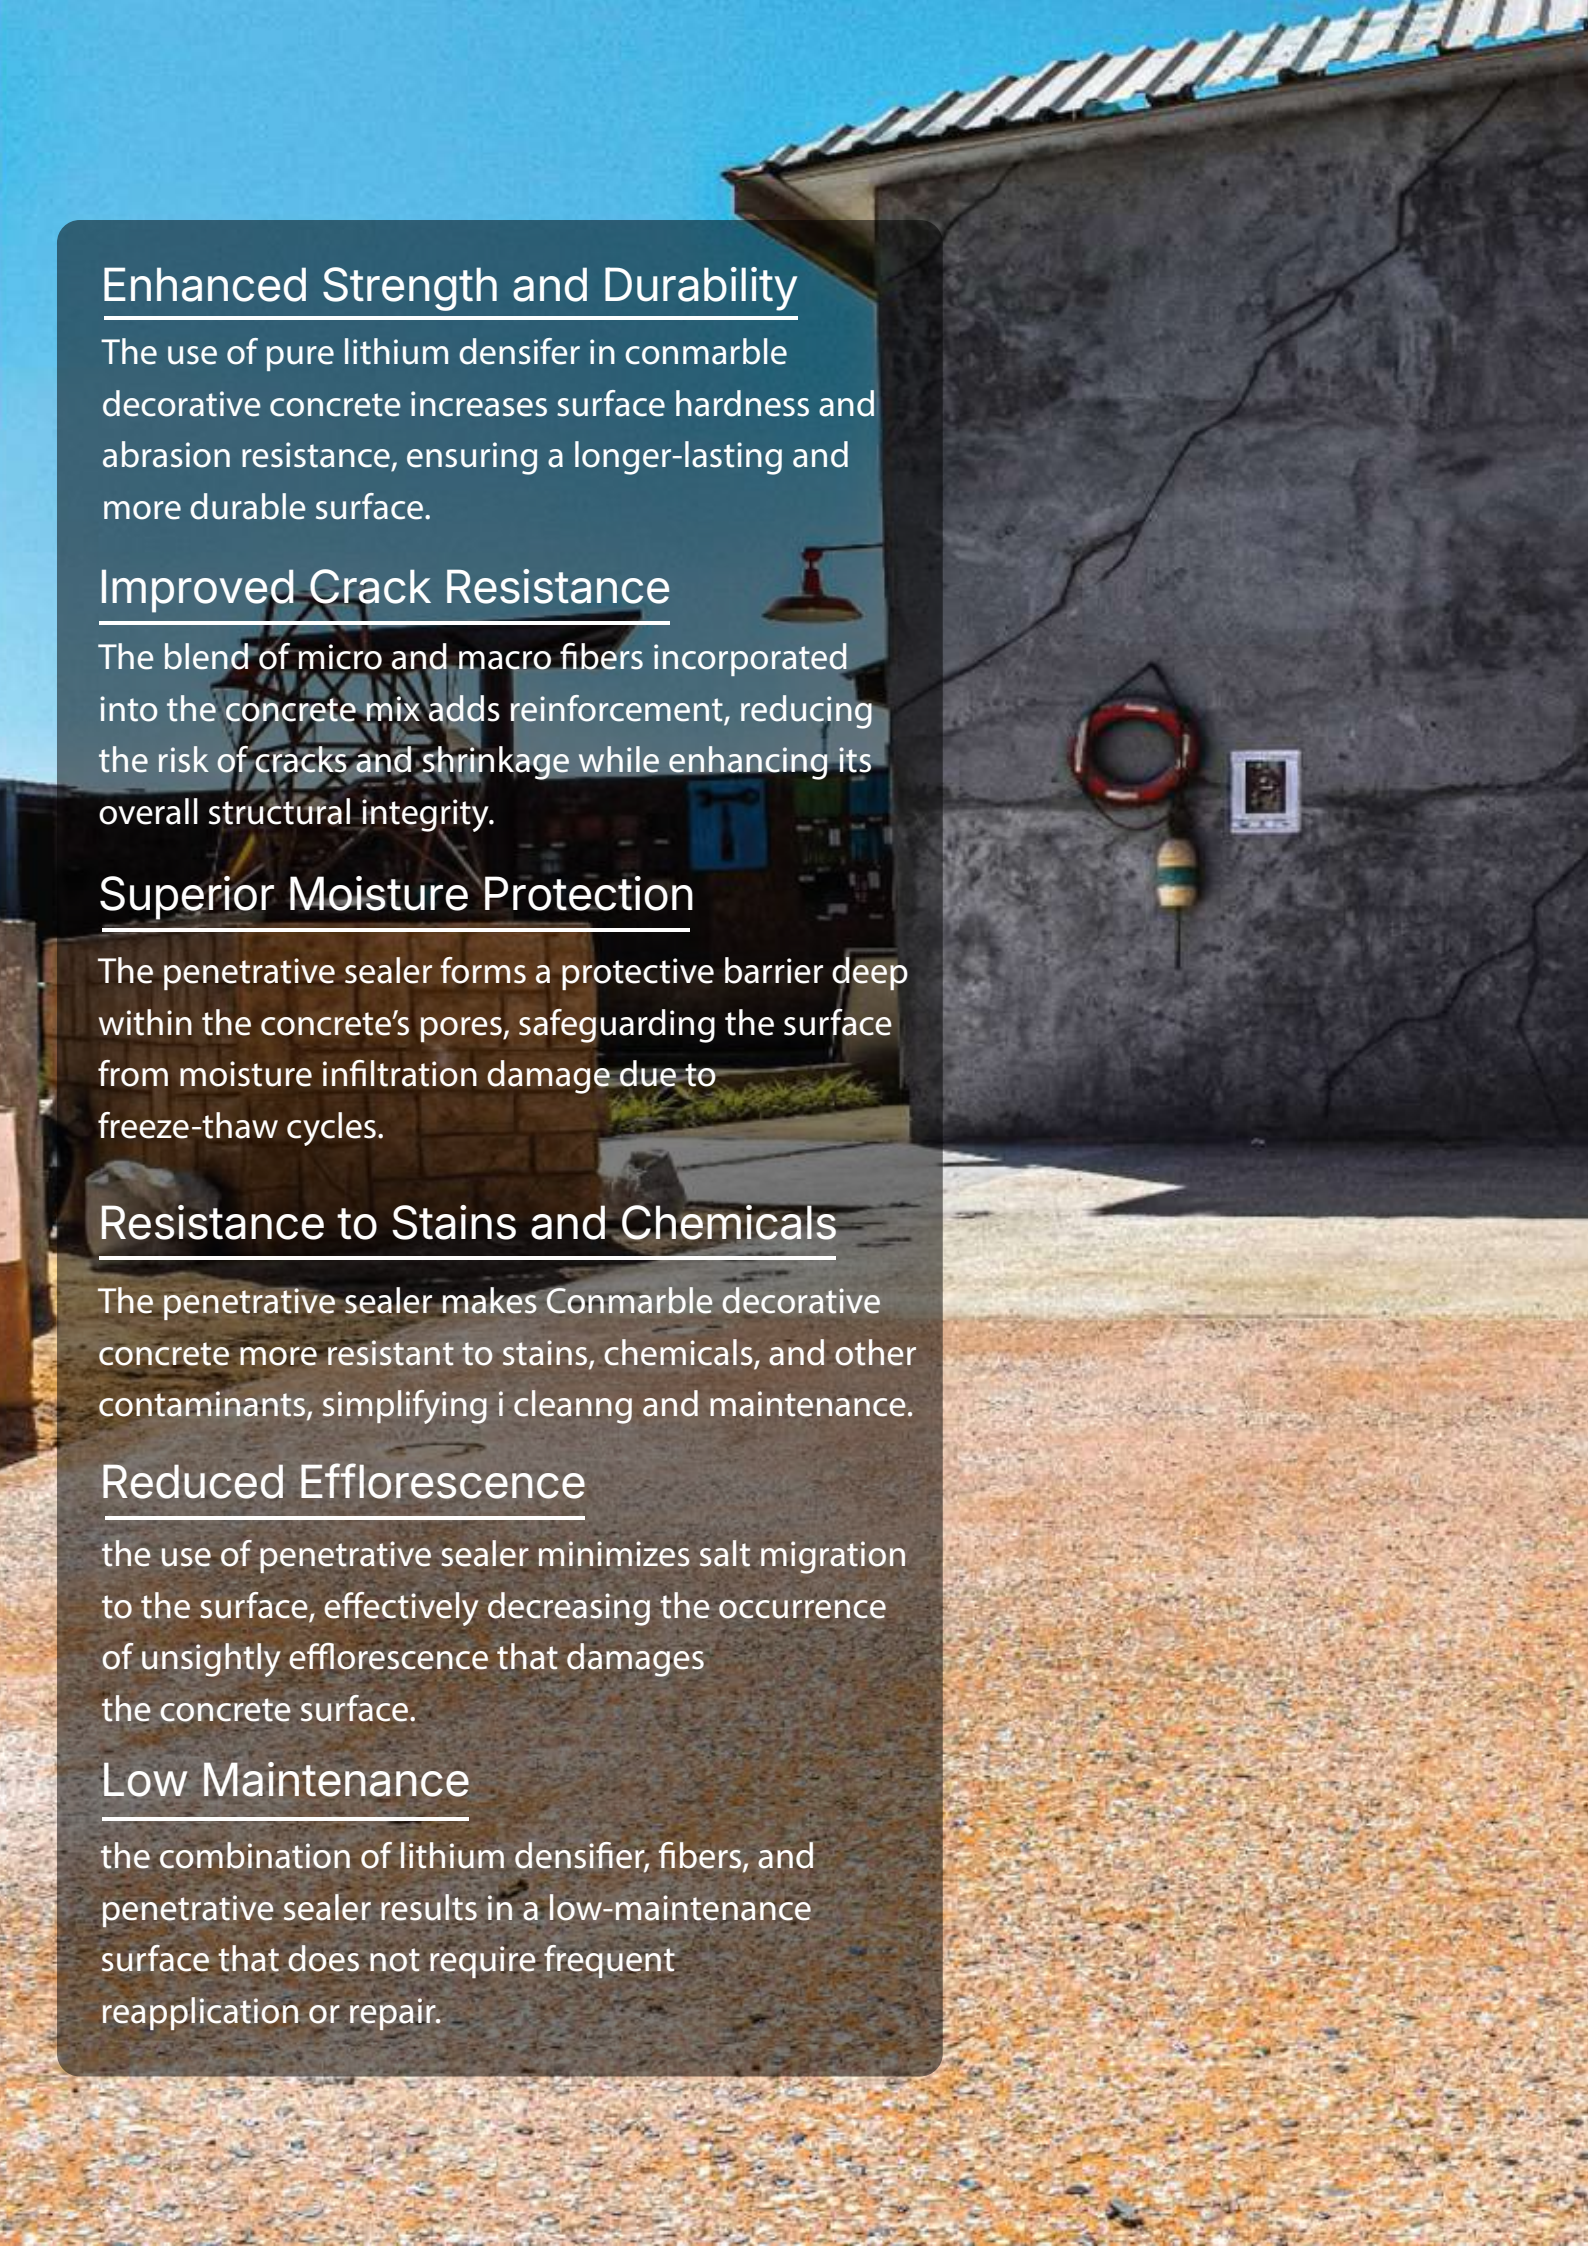

The penetrative sealer makes Conmarble decorative concrete more resistant to stains, chemicals, and other contaminants, simplifying cleaning and maintenance.

Reduced Efflorescence

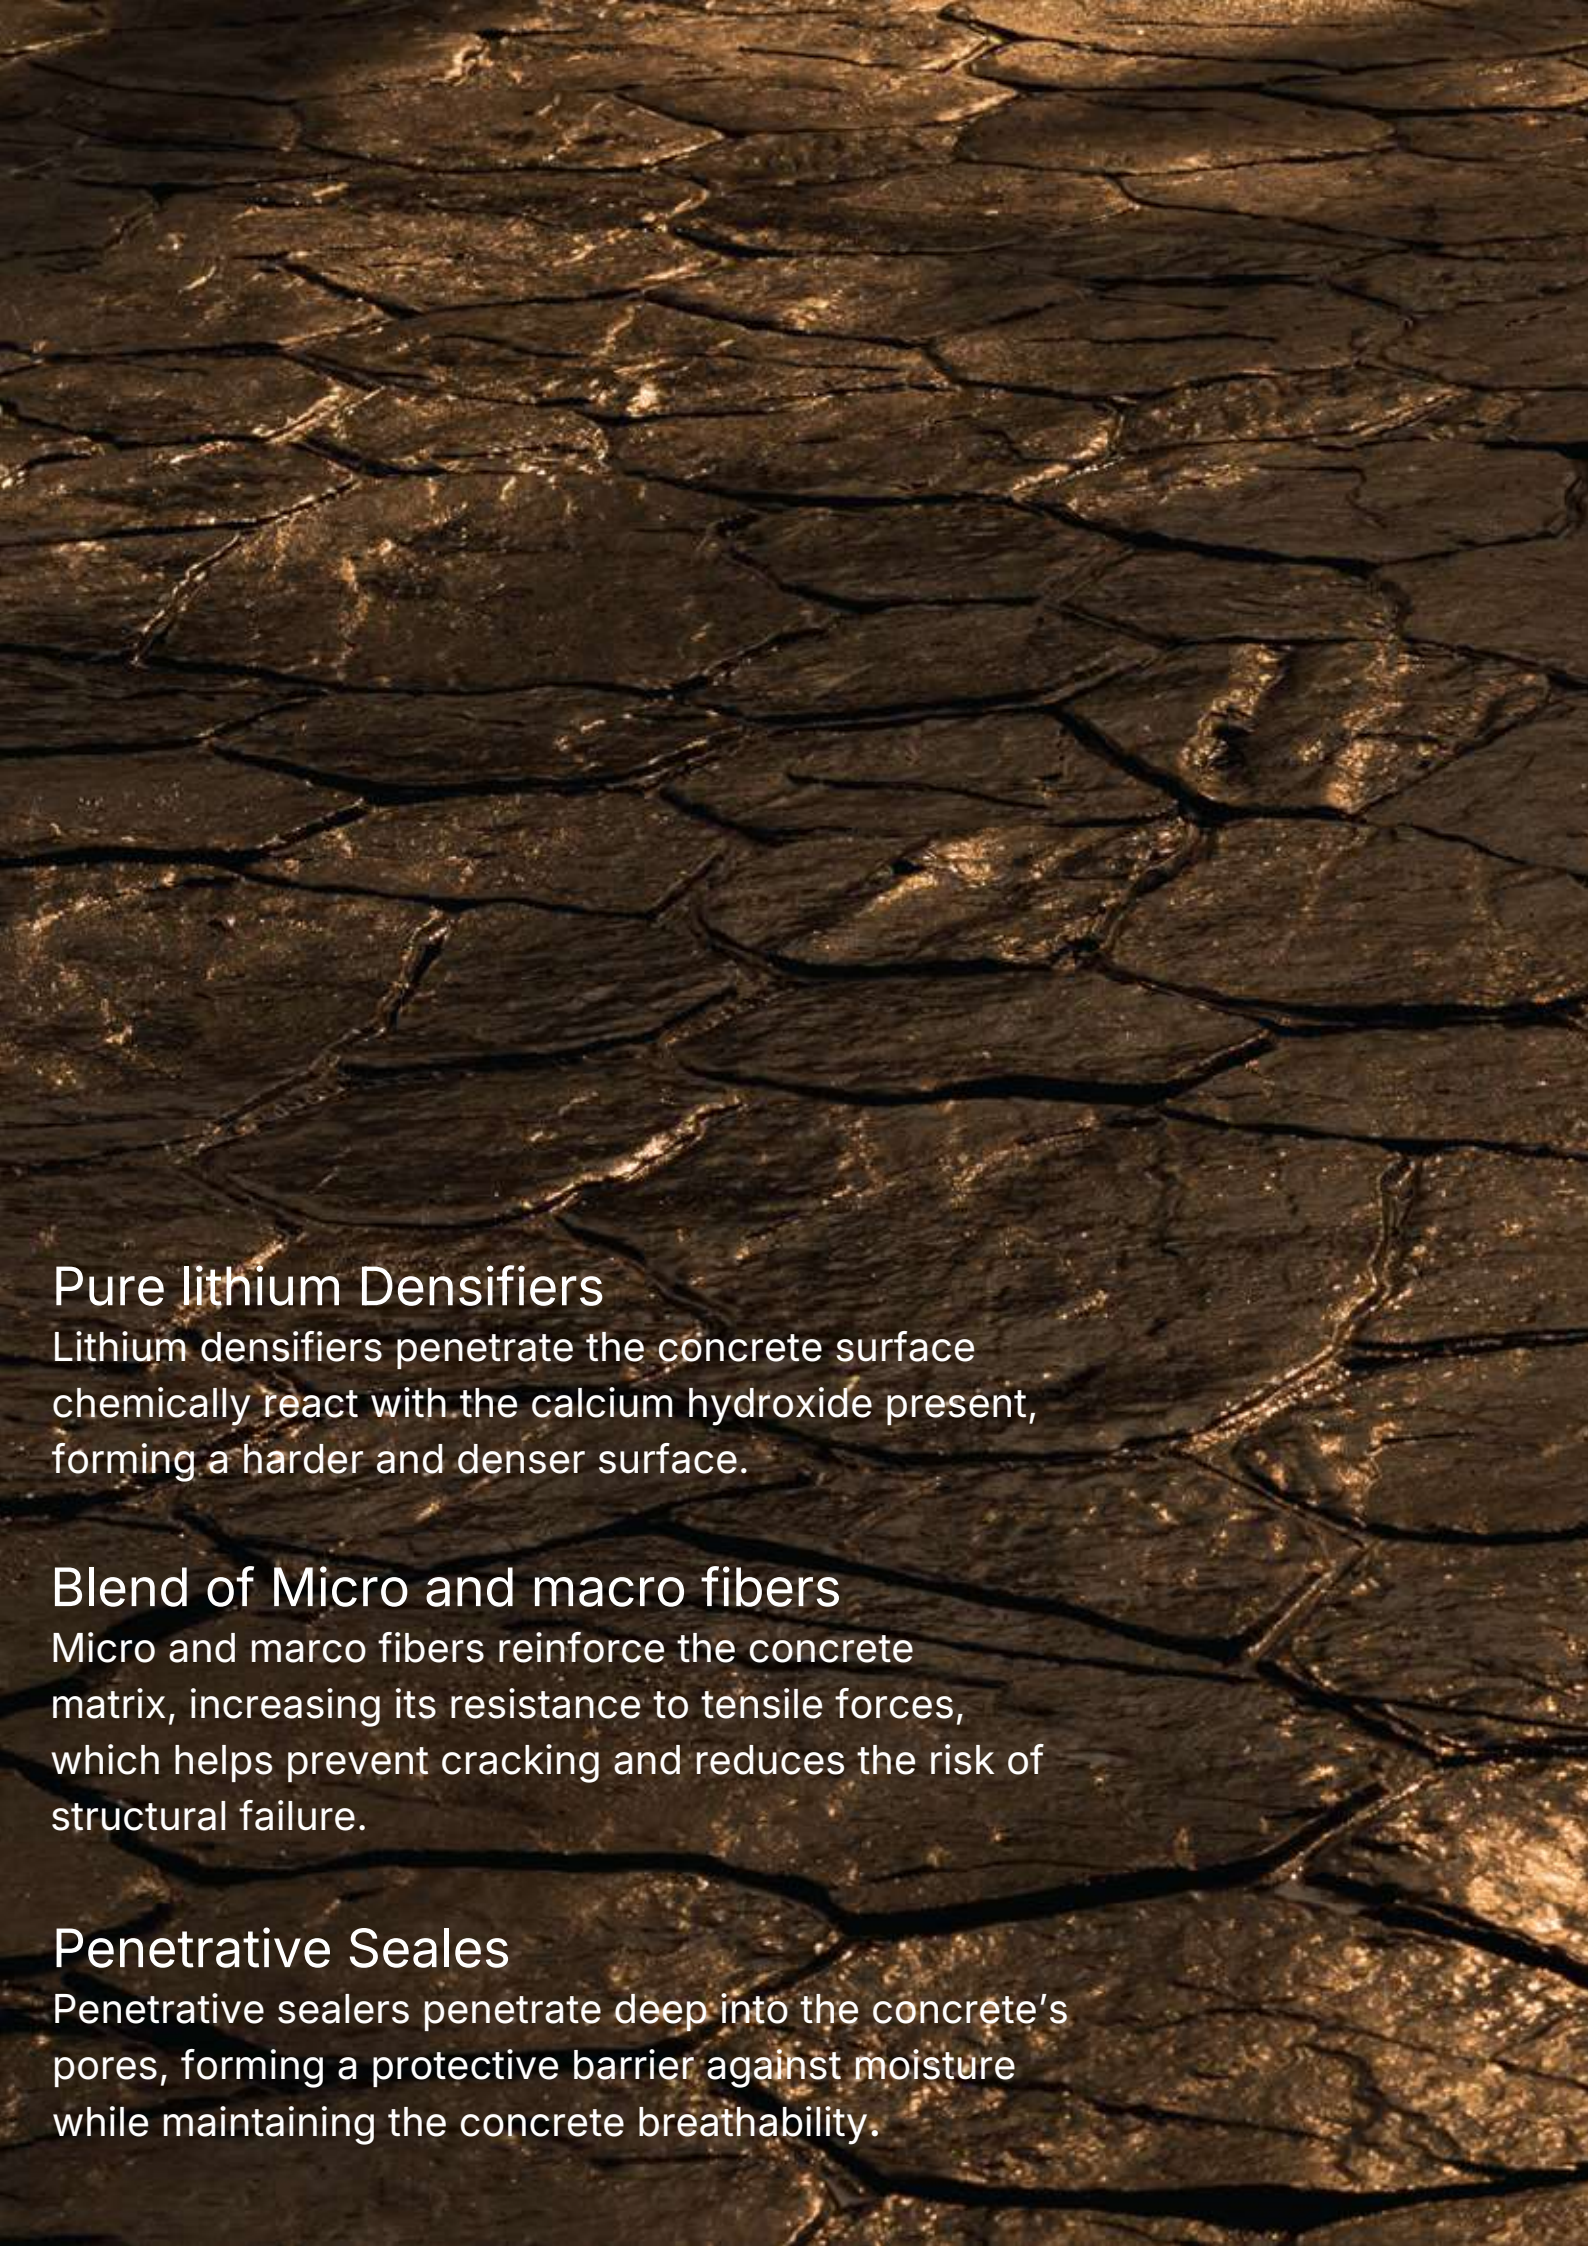

the use of penetrative sealer minimizes salt migration to the surface, effectively decreasing the occurrence of unsightly efflorescence that damages the concrete surface.

Low Maintenance

the combination of lithium densifier, fibers, and penetrative sealer results in a low-maintenance surface that does not require frequent reapplication or repair.

Pure lithium Densifiers

Lithium densifiers penetrate the concrete surface chemically react with the calcium hydroxide present, forming a harder and denser surface.

Blend of Micro and macro fibers

Micro and marco fibers reinforce the concrete matrix, increasing its resistance to tensile forces, which helps prevent cracking and reduces the risk of structural failure.

Penetrative Seales

Penetrative sealers penetrate deep into the concrete's pores, forming a protective barrier against moisture while maintaining the concrete breathability.

Conmarble Signature Stamped Concrete

Imprint, Conmarble's signature stamped concrete, is a masterful fusion of style and durability, offering a versatile and visually appealing solution for various applications. This innovative product is designed to replicate the look of natural materials, such as stone, brick or wood. While providing the resilience and longevity of concrete. As a part of Conmarble's decorative concrete line, Imprint is ideal for transforming driveways, patios, walkways, and pool decks into eye-catching outdoor spaces which are visually stunning surfaces for their outdoor living spaces.

Signature Polished Concrete

Polish Plus, Conmarble's signature polished concrete, is the epitome of style and sophistication, seamlessly blending functionality with an unrivaled aesthetic appeal. As part of Conmarble's decorative concrete line, Polish Plus is designed to transform ordinary concrete surfaces into visually striking, high-gloss floors that are not only stunning but also incredibly durable. This state-of-the-art polishing technique uses advanced grinding and polishing equipment to achieve a smooth, mirror-like finish that enhances the beauty and longevity of the concrete. Perfect for both residential and commercial applications.

OUR Projects

INNOVATIVE ECO-FRIENDLY SUSTAINABLE

Conmarble projects blend innovation, luxury, and sustainability to create visually stunning and environmentally friendly spaces. their skilled team of designers and artisans utilize high-quality materials, such as Giorgio Graesan's Venetian plaster, to craft unique and elegant interiors. conmarble's commitment to excellence and cutting-edge design has made them a leading choice for upscale residential and commercial projects in Qatar and beyond.

Aspire Palace redefines luxury living with its innovative interior design, seamlessly blending aesthetics and functionality. The contemporary touch to the living spaces, coupled with attention to detail, ensures harmonious and opulent environments that cater to the needs of modern-day residents seeking comfort and sophistication.

LUSAIL INTERNATIONAL CIRCUIT

Our involvement in the construction of the Lusail International Circuit stands as a testament to our unwavering commitment to excellence. From the outset, we approached this project with a blend of passion and precision, fully aware of the circuit's significance on the global stage. Our expertise in concrete craftsmanship allowed us to seamlessly execute the installation of exposed aggregate concrete walkways and super-flat flooring throughout the circuit's technical areas. Every aspect of our work at Lusail International Circuit was meticulously planned and executed to the highest standards. We meticulously sourced the finest materials and utilized cutting edge

techniques to ensure that our installations not only met but exceeded the expectations of our clients and the racing community at large. The exposed aggregate concrete walkways not only provide a visually stunning backdrop but also offer practicality and durability, expected in such a prestigious venue. Similarly, our implementation of areas of the circuit demonstrates our dedication to functionality and performance. We understand the importance of providing a stable and level surface in these critical areas, where precision and accurate planning and meticulous execution are paramount. Through careful execution, we delivered flooring solutions that meet the rigorous demands of the racing industry,

STATE-OF-THE-ART CONCRETE WALKWAYS AND SUPERFLAT FLOORING.

The yard Qatar, a premier destination for luxury interiors, showcases the exquisite beauty of venetian plaster. This versatile, eco - friendly, and sophisticated wall finish elevates the space, reflecting timeless elegance. with a wide array of colors and textures, Giorgio Graesan's venetian plaster transforms The Yard into an inspiring haven for designers and homeowners alike.
